WGISS Connected Data Assets

The WGISS Connected Data Assets include the International Directory Network (IDN), FedEO (Federated Earth Observation Gateway), and CWIC (CEOS WGISS Integrated Catalog). WGISS-supported standards are now used to search and access data from thousands of collections and hundreds of millions of inventory records, with additional data collections and inventory records from CEOS Agencies being added daily to this integrated system.

The WGISS Connected Data Assets also provide access to CEOS Agency datasets through their integration with the GEOSS (Global Observation System of Systems) Common Infrastructure (GCI). More and more, CEOS Agencies continue to adopt the WGISS-supported standards (OGC CSW 2.0.2 and CEOS OpenSearch Best Practices) and make their data discoverable via the WGISS Connected Data Assets. Learn more about accessible CEOS Agency datasets on the WGISS website: wgiss.ceos.org.

The WGISS Connected Data Assets System Level Team provides coordination and oversight of the operations and evolution of this integrated system and also provides technical support for CEOS partners that offer access to data.

Questions about any system (IDN, FedEO, CWIC) that is part of the WGISS Connected Data Assets systems can be sent to "Access-SysTeam-Help@wgiss.ceos.org.
